

THE ARBITRAGE BETTING CHEAT SHEET

DISCOVER HOW I MADE £1,561
LAST MONTH USING ARBITRAGE BETTING
(without spending a lot of time & money)

WHAT IS ARBITRAGE BETTING?

Arbitrage Betting takes advantage of the high competition in odds between online bookmakers. When bookmakers odds vary enough we can bet on all outcomes of the event and win a profit of around 2-10% no matter what.

This may seem like a small return of £2-10 at first (given a £100 stake) but over time this can lead to great profits.

Arbitrage is similar to matched betting but instead of using free bets to get a risk-free profit it uses the natural variation in odds instead.

Matched betting sites will frequently mislead their subscribers into thinking you can't arb without getting limited to keep subscribers from leaving their website. There are hundreds of thousands of people who arb worldwide successfully so this is simply not true.

Arbitrage betting has been dubbed as "the only way to make constant profit" in sports betting and there are tens of thousands of people who regularly arb because it is typically a far better way to invest money than a bank.

HOW DOES IT WORK?

Example You bet on a football match.

Swansea v Wolves

The odds for the game to have total goals of over 2.5 has odds of 2.6

The odds for the game to have total goals of under 2.5 has odds of 1.75

We place a total stake of £100 and have covered all outcomes.

We make £4 profit if **Outcome A** happens & £5 profit if **outcome B** happens.

Stake	Bookie	Outcome A	Outcome B
£40	Marathon	$2.6 \times 40 = \text{£}104$ (+£4)	
£60	188Bet		$1.75 \times 60 = \text{£}105$ (+£5)

To break down what is shown in the table.

If there are over 2.5 goals in the match, your return will be a total of **£104** ($2.6 \times \text{£}40 = \text{£}104$). **£4 profit**

If there are under 2.5 goals in the match, your return will be a total of **£105** ($1.75 \times \text{£}60 = \text{£}105$). **£5 profit**

Remember we've only place a total of £100 so anything over this figure is profit.

HOW I MADE £1,561 LAST MONTH?

So making £4-5 in a couple of minutes doesn't sound like a mindblowing profit but these opportunities are evergreen meaning that you're never waiting on a free offer or reload offer and you're not risking money unlike betfair trading and tipsters. You'd actually be amazed how quickly these arbitrage bets compound and turn into serious cash, here's a breakdown of my income from a couple months back when I made £1,561.

Month 3	Arb 1	Arb 2	Arb 3	Arb 4	Arb 1 Profit	Arb 2 Profit	Arb 3 profit	Arb 4 Profit
1	4.9%	5.5%	6.9%	7.2%	£ 10,58	£ 10,66	£ 14,91	£ 15,55
2	5.0%	5.6%	5.5%	6.3%	£ 9,60	£ 12,10	£ 11,44	£ 13,62
3	5.8%	6.1%	7.1%	5.2%	£ 12,53	£ 11,71	£ 14,77	£ 11,65

								£ 1,561,81

COMMON QUESTIONS ABOUT ARBITRAGE BETTING

Do I need to be in the UK?

It helps to be in the UK as we have the largest amount of bookies in Europe but as long as you have access to a decent amount of mainstream bookmakers sites you should be fine.

Do I need to have bookmaker accounts open?

Yes you need bookmaker accounts open to do this.

Won't the bookmakers limit my account if they think I'm arbitrage betting?

It's true that some bookmakers are not too keen on arbitrage betting but it's easy to stay under the radar.

The 3 things to consider are:

- 1 - The amount of stake you place
- 2 - how big a % the arb is
- 3 - how mainstream the event is.

If you balance these three factors then you can keep accounts open for years (contact team@betslayer.com for more detail on this)

Is it legal?

Arbing might seem too good to be true, but it is an entirely legal way to bet. All you are doing is taking advantage of the differences that occur in the market.

Won't it take ages for me to withdraw funds?

If you use Skrill you can withdraw funds to your Skrill wallet in 12 hours and load bookie accounts instantly making it easy to control cashflow and easy to take advantage of arbitrage opportunities.

How do I find opportunities for arbitrage and calculate the right stakes?

How much money do I need to get started?

You say its risk-free, so what's the worst thing that can happen?

Even though Arbitrage is risk-free, there are certain things you have to keep in mind when implementing it. Like in the rare case that a bookmaker doesn't accept your bet, but you've already placed 1 out of 2 outcomes of the arb?

There are 2 solutions for this.

1. Many bookies will allow you to cash out of a bet, you can do this on your original bet and lose a couple quid.
2. Or you can find similar odds on our software dropdown menu and place a bet with another bookmaker. This feature means you could still make just as much money, or if they are slightly worse odds, you may win or lose a couple of pennies.

So why isn't everyone doing it?

A lot of people don't know this exists and if they do they are overwhelmed by thinking they have to calculate every arb themselves or pay £100+ a month for betting software. Using Betslayer you only have to make 1-2 bets a month to make a good profit of the service.

THE CHECKLIST BEFORE PLACING AN ARBITRAGE BET

1. Event is less than 7 days in advance (helps with bankroll too).
2. Use round to 5 feature to bet round figures ie. £55, not £53.17.
3. Bet stakes less than £200 .
4. Relatively mainstream (ie. not challenger tennis or romanian premier league)
7. Open both bookmakers & events side to side to reduce the time gap between placing a bet and the other and double check
8. Don't bet too much if you're inexperienced. Small stakes trading. This will eliminate the biggest problem which creates all the other problems, and that is inexperience. If you start trading with small stakes, you will gain experience and any error from your side won't bring you a major loss. It's not like matched betting when you miss out if you don't bet too much, its evergreen there will be another arb tomorrow.
9. Never choose an arb which has more than a 10% ROI as may be palp error. (unless you know what you're doing!)
10. Keep outcomes to 2-3 so it's easy to place the arb.
11. Have bookmaker accounts preloaded from your skrill wallet.

Our Arbitrage betting community is not for everybody though...

You must be:

- Disciplined and consistent
- Not have a “get rich quick” mentality
- Be willing to put in a couple hours a day for the first couple of weeks to learn the ropes

Now you know the fundamentals of arbitrage betting why not sign up for a trial of Betslayer?

Betslayer finds you hundreds of unique arbs opportunities in real-time every day, calculates the right stakes for you and uses anonymous deep linking to add to betslip automatically.
